## **ABSTRACT**

Technology metaverse can help all aspects of lives, but people must be aware, of limited information and literacy have negative impact. So, there is a need for socialization about the metaverse. This research is Systematic Literature Review approach, apart from that this research will analyze how the legal side is to invest in metaverse technology and future legal projections to this metaverse technology sector. The results are regulation for metaverse is low and need developed because the metaverse is abstract. Situation in Indonesia, the development of law towards metaverse is still in parliament and is still in the form of a bill. Second research question, a review of legal projections in the future by parliament to make policy and support for the metaverse technology for provide guarantees. Indonesia must be prepared for this metaverse of technology because in the future the world will change adaptation is needed without compromising.
